I love painting

I read the text carefully.

(Souha was born on December 4th, 2004) in a little village in the south of Algeria; Ouled Djelal Biskra. Her father taught her to love books and drawing. Her talent was displayed in Art. The neighbors realized her gift in the area and admired the careful accuracy of the drawings.

(Souha is interested in painting) and influenced by her father. She's a fan of the famous painter "Frida Kahlo" and she is determined to be a successful artist as Frida Kahlo.

Souha's paintings are colorful, bold and passionate. She always watches her teacher of Art how to draw and paint.

She learns at school how to mix paint to make just the right color for her paintings. She often looks at pictures of other artists. It is important for her to do this. It helps her to think of things that she wants to paint or to draw. Souha has an exhibit in May this year. Her work will be in one of the banks in her hometown. Souha is inviting people from the community to her exhibit. Her parents are invited to go as well.

Souha is working on her three paintings right now. This talented girl has other hobbies; she can practise swimming and tennis. Everybody say (Souha is a talented, patient and polite girl).

Souha hopes one of the three drawings will be chosen to be in the exhibit. She enjoys having a goal to work toward.

My favourite class is Science

I read the text carefully.

My name is David. I'm 13 years old and I live in Arizona, Phoenix, America. I'm fond of Science Classes because I like doing the experiments, learning something new after each lab.

Science is a wonderful and amazing subject that helps us to explain the world. My aim is to be a doctor. I like to become a doctor and treat patients. I will study hard to achieve my dream.

This is Madison; my classmate. She's from Colorado, Denver but she lives in Arizona. Right now, we are at the Biology lab with the teacher. Madison is keen on Science too because she enjoys learning and discovering things that people have never known before. We both love animals, trees and plants. We are interested in making experiments; it's so exciting!

I am a sporty boy; I can practise shoot, water jump and biking. Madison says I'm creative, sporty and funny. Maddy is a sporty girl too. She can practise discus throw, and rowing. She's hardworking, energetic and wise.

Noa's Experiments

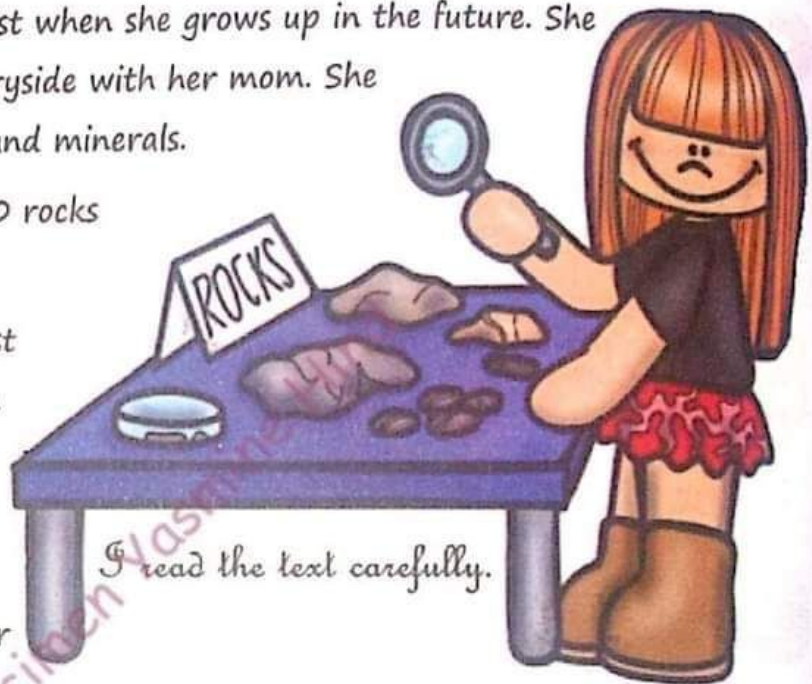

Noa is 16 years old. She is from Spain.

She dreams to be a scientist when she grows up in the future. She always walks in the countryside with her mom. She collects samples of rocks and minerals.

She has a collection of 150 rocks and minerals.

Noa wants to be a geologist to study rocks. She is keen on rocks because she is curious about what the earth was like in the past.

For example one particular

area can have experienced changes as changing from a desert to a swamp to a coral reef under the sea. Different rocks can tell us something important about the past. Noa is always doing experiments on rocks. She learned many things; the studies helped her to discover if there was a lake or a volcano present where the rock was found. If there was a mountain range or a sea. If it was hot or cold. And if the atmosphere was thick or thin.

Noa is very interested in studying how the earth and other planets worked in the past. Noa hopes to understand how the Earth and its life responded to temperature changes in the past so that she can better understand the effects of the global warming that is happening today. Noa is a very ambitious girl. She's also good – tempered and smart. Good luck Noa!

The future botanist

I read the text carefully.

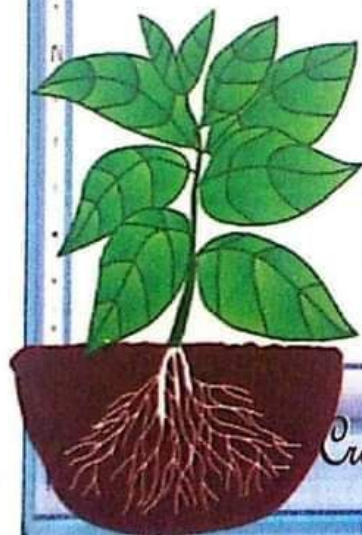

Belen Landivar is a Bolivian girl. She lives in Santa Cruz de la Sierra. She's 13 years old and she's keen on studying about plants. She likes Biology a lot and says that Botany is important because people and animals depend on plants in many ways.

People and animals get food and oxygen from plants. People also use plants to make clothing, building materials and chemicals.

Like animals and all other living things, plants are made of cells.

A cell is the smallest and most basic unit of a living thing. Plants can't move from place to place to find food and water like animals can. So how do plants meet their needs? They have parts that help them get the things they need to stay alive.

Almost all plants have three parts; a root, a stem, a leaf. Each part does a job that keeps the plant alive. Belen is also interested in music. She can play the cello, the triangle and the maracas. She always practises these instruments with the music teacher. Belen is a curious, shy, and active girl.

My name is Beatriz and I'm 13 from San Juan; the capital city of Porto Rico but I live in Quebec, Canada with my parents and my brother Mateo.

We are in Canada because our parents work here. My father is a businessman and my mother is a housewife. Mateo and I attend a school closest to our house.

Our classes start at 8 o'clock and finish at two o'clock in the afternoon.

There are lots of after the school. I go to the sports club because I'm keen on gymnastics and hurdles.

My favourite subject is physical education of course!

On Tuesdays and Thursdays, I go to Drama Club. I always have drama lessons through fun.

My brother Mateo doesn't enjoy Drama lessons. He prefers painting. He is one year older than me and he is more talented too. Mateo is very good at playing the piano, the guitar and the saxophone. He is keen on fishing; he always takes me with him. It's so funny!

Meet my teacher

My favorite teacher is Mrs. Archer. She is from Askern, South Yorkshire, England.

She teaches me English. She has got sparkle eyes and red hair. She is just a bit taller than me. She always smiles to us as we see each other in the hallway at school.

Mrs. Archer seemed very strict when the first I met her. But we have a lot of fun during her classes. She has skills at teaching and sense of humor. She's really friendly, patient and easy going.

I always get good marks on her tests. She's very patient and enthusiastic to teach us.

Mrs. Archer enjoys eating Chinese and Japanese food. She's also very musical. Her favorite band is West life. She always encourages us to do voluntary work after school or at weekends.

I love walking in the hill

Hi! My name is Jordan and I'm American. I live in South Dakota in the United States.

I'm 14 years old. I did not go on my first hike until my mid 12s.

I grew up on the Great Plains of South Dakota but I wasn't interested in climbing mountains.

I went my first hike 2 years ago with my father and my two elder brothers. We walked a beautiful forest and carried a small back pack with water and snacks.

When we reached the top, we ate lunch together overlooking a wonderful landscape and I fell in love with climbing mountains.

I always hike down in weekends with my best friend Alvin. Climbing mountains is a healthy physical exercise that creates wonderful memories. It provides opportunity to slow down and disconnect. Really hiking teaches us important truth about life.

I love the calm of empty trail. It reminds me how much I like hearing no noise at all. I'm also interested in music. I can play the saxophone; I'm a fan of Jazz music. My friend Alvin says I'm adventurous, detective, ambitious and dreamer. If you can climb a mountain, you can do anything.

Hello! I'm Mayar Mohamdi. I am 14 years old. I was born in Maascar, Algeria, but now we live in Algiers. It's a nice place for living with a lot of places to go to or to visit. I attend a public school a bit far from home, so I have to take the bus to get there. My favourite school subject is Science because I love experiments a lot.

I have got two younger siblings— they are twins. Aymen is on my right. He loves bugs a lot. He always keeps bugs and studies about them. He is keen on reading books about bugs and insects. He is a very kind and calm boy. Amina is on my left. Her favorite school subject is English. She loves reading especially fairy tales. Amina is a very talented girl; She can play three musical instruments; the tambourine, the keyboard and the guitar. She also helps Aymen with his homework. Collecting bugs

I am Mark and I'm 12 years old. I'm from Costa Rica. We have got many wonderful bugs in our region and all teens of my age are interested in them.

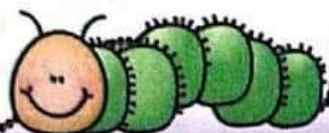

I always watch documentaries on bugs.

I'm keen on reading books.

I have many wonderful encyclopedias about bugs. I'm very curious and I always wanted to learn more about these tiny living creatures.

In summer, I always look for bugs. I'm mad about all kinds of bugs. Last summer I found a bee, three caterpillars and many ants. It is fun to look at and learn about new bugs. I'm a real fan of fire flies. I love the way they light up the sky at night. I am a little afraid of bees but I know that they make honey and I love honey! I think, I like butterflies most of all because they are so pretty. I think I'm relaxed, helpful and respectful towards nature.

I am interested in music too. I love all Spanish music. I like singing in karaoke clubs. I can play the flute too.
